

Abstract of the technical disclosure for – **Retract / collapsible system
or bed of every existing truck**
Collapsible fixture bolted to bed of any
existing pick up bed.

When collapsed it will lie flat on bed of truck, when retracted it will create an "X" like Figure, from floor of bed to roof base of cabin of truck. The "X" consists of (5) five joint each can move to make X higher or lower depending on the height from floor of bed o roof top of cabin. The materials used will be light metal alloys to permit lightness yet strength. When collapsed it will not occupy any room in bed space, when retracted it will allow objects bigger than bed to be carried on top of roof of cabin extending on top of "X" figure.
